Diagram 1.1

In the screenshot above you can see that the HUB@KDU app needs permission to access your local storage because of the download function which downloads a .pdf format copy of the invoice to the local storage of the phone. If you check the box for "Don't ask again" then the functions can't be carried out such as the view function and the download function. To revert your action please press the button at the bottom of the FAQ page for the Permission dialog box to be triggered so that you can enable permission seamlessly. If nothing pops put you either granted permission or you have to manually go to the settings to grant access which has been shown in the next page.
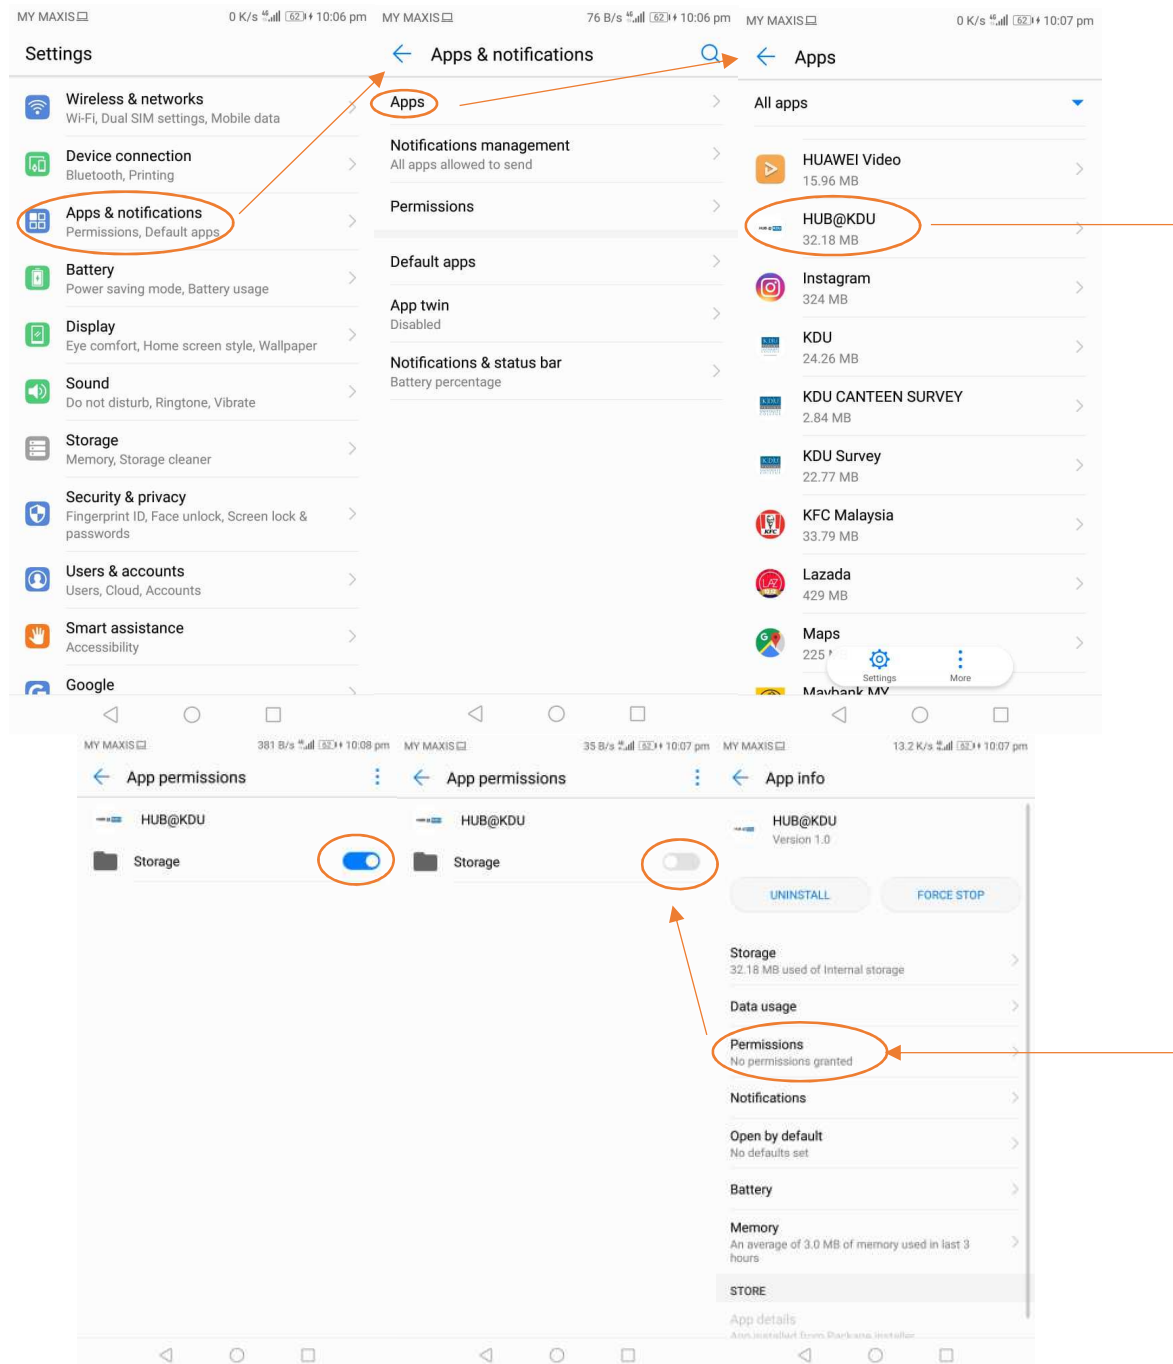

Diagram 1.2

To revert your action, follow the steps as shown above if you are using Huawei android. Note: The layouts of the settings might differ based on your brand or model of your android device.

Refer to the steps as per below.

Steps:

1. Open your settings from the menu
2. Navigate to Apps & Notification
3. Press on the Apps category
4. Navigate yourself to find the app named **HUB@KDU**
5. Find for the setting which is named **Permissions**
6. Press on the slider next to the storage
7. If the slider's colour changes depending on the model of the phone you have successfully granted storage permission for your phone
